SUMMARY

Motivated Full Stack Developer with 2 years of hands-on experience in building responsive and scalable web applications. Skilled in modern JavaScript (ES6+), React.js, Tailwind CSS, Node.js (Express), and MySQL. Strong foundation in RESTful APIs, authentication systems, and Git-based version control. Demonstrated ability to collaborate in Agile teams, solve complex problems, and deliver clean, maintainable code. Eager to grow technically and contribute to real-world projects.

SKILLS

HTML5	Tailwind css	RESTful API	MongoDB	Communication Skills
JavaScript	Bootstrap	JWT	Git & GitHub	Time Management
CSS3	Bootstrap	Sequelize	Agile Development	Problem Solving
React js	Express	MySQL	UI/UX Fundamentals	Fast Learner

PROFESSIONAL EXPERIENCE

Backend Engineer ICS Jordan

Nov 2025 - Present

- Collaborated with the backend team in an Agile environment to develop and maintain an academy platform connecting multiple creators with their students.
- Built and enhanced backend services and RESTful APIs to support user management, course delivery, enrollment flows, and platform operations.
- Contributed to scalable and maintainable system architecture to ensure reliable performance for both creators and learners.
- Worked closely with frontend developers, product teams, and stakeholders to deliver features aligned with business and user needs.
- Participated in sprint planning, daily stand-ups, and code reviews to ensure high-quality development and timely delivery.

Full Stack Developer (Web and Mobile) SkilloApp

May 2024 - Nov 2024

- Designed and developed an innovative Riddles App: Created a mobile application aimed at improving employees' skills, such as problem-solving and logical thinking. Leveraged full-stack development expertise to deliver a seamless, engaging, and interactive user experience.
- Built a comprehensive web dashboard for analytics: Developed a web-based dashboard that enables clients to monitor employees' skill progress. Integrated advanced analytics and visualizations, providing actionable insights and statistics to assess and track performance.
- Implemented end-to-end functionalities: Designed and implemented critical features, including user authentication, dynamic riddles delivery, skill tracking algorithms, and real-time progress updates, ensuring robust and scalable solutions.
- Ensured application quality and scalability: Conducted rigorous debugging, performance optimization, and feature enhancements based on client feedback and user data, ensuring the applications remained efficient and reliable.

React Native Developer
7isas

Nov 2023 - March 2024

- Developed and maintained a robust React Native application: Spearheaded the development of a mobile application for 7isas, a marketplace focused on upskilling courses. Leveraged React Native to build a user-friendly, cross-platform application, ensuring a seamless user experience.
- Implemented key features and functionalities: Led the implementation of critical features within the application, such as user authentication, course search and filtering, payment integration, and interactive user interfaces, enhancing the platform's usability.
- Collaborated in an Agile development environment: Actively participated in Agile methodologies, contributing to sprints, daily stand-ups, and regular code reviews. Collaborated with cross-functional teams to ensure timely delivery and alignment with project goals.

Full stack web and mobile developer
Coding Academy By Orange

Feb 2023 - Aug 2023

- Developed 10 impressive projects, showcasing my proficiency in front-end technologies such as HTML, CSS, JavaScript, and Bootstrap, as well as my expertise in React for building dynamic user interfaces.
- Collaborated on a React-based project, contributing to the development of dynamic and interactive user interfaces that enhanced user experience and increased user retention.
- Successfully integrated SQL and MongoDB databases into web applications, ensuring efficient data storage, retrieval, and manipulation, and maintaining data integrity.
- Designed and built RESTful APIs, enabling seamless data integration and communication between front-end and back-end systems, improving overall system functionality.
- Demonstrated exceptional problem-solving abilities by resolving complex technical issues, optimizing code performance, and ensuring smooth project execution.

EDUCATION

Hashemite University
Bachelor's Degree in Software Engineering

2025

PROJECTS

ChatBot

This project has been an incredible journey, allowing me to dive deep into the world of conversational AI and explore the limitless possibilities it offers. With React as my framework and OpenAI's API as my powerful tool, I've created a ChatBot that can engage in dynamic conversations, answer questions, and provide personalized assistance.

Movies Platform

(Live Demo)

With my expertise in React, I've created a seamless and user-friendly interface that allows you to explore a vast library of movies and TV shows from various genres and eras.

Utilizing the movies API, I've integrated comprehensive information such as synopses, ratings, cast and crew details, making it easier for you to make informed choices about what to watch next

Travel Planner - Group project

(Live Demo)

Using React as my framework, I've crafted platform that allows users to explore a wide range of travel destinations, uncover hidden gems, and plan their dream vacations with ease.
